

Bad Example: This house is not isolated so
its wasting energy

Bad example - Llama Alpaka

- imported from latin america
- by ship creating greenhouse gases
- invasive specie, can kill sheeps
- spits at and attacks people
- it is picky and only wants to eat high quality plants - destroys biodiversity

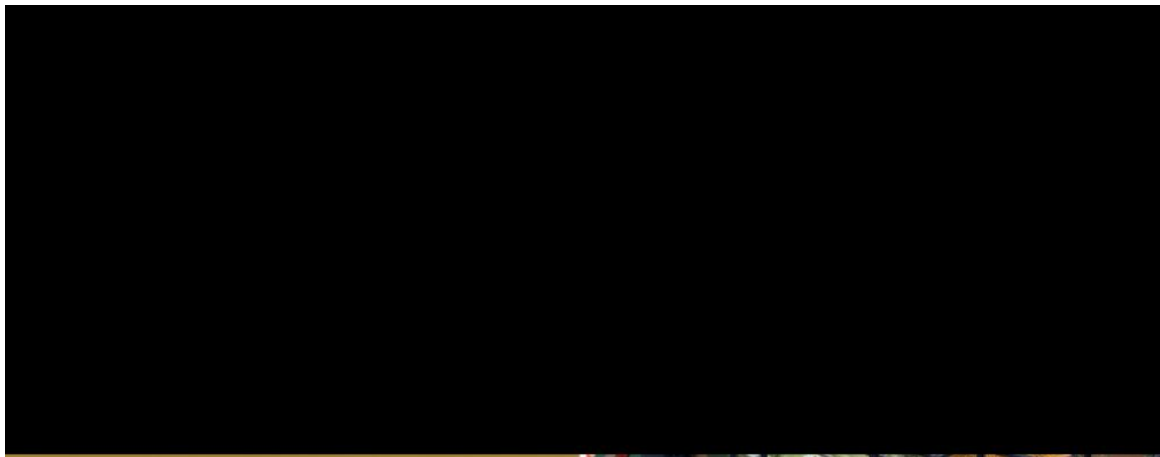

Bad example
tire in the river

Cutting down of trees can be seen, it will eventually affect flora and fauna.

Cigarettes waste contains a non-biodegradable waste that pollute soil, beaches and waterways

Plastic bags and bottles take hundreds of years to decompose, pollute our oceans and harm wildlife. They also contribute to the growing problem of plastic waste and pollution.

Waste along the street

Trees being cut down is bad

Polluted water

Much of the planet is swimming in discarded plastic, which is harming animal and possibly human health. Plastic can take anywhere from 20 to 500 years to decompose.

Drunk person is the
problem

Broken car parts

A lot of plastic waste in the forest

Rubbish around a trash bin

Old car with waste inside

A can near the road, probably thrown away from a car

Trash around a bus stop

Cutting grass very shortly – killing biodiversity

Plastic bag at the stream

Construction waste

Old parts of wheels along the road

Trash and cigarette leftovers

Old tyres thrown in a stream

Bottles carelessly dumped

Old box in the grass - rubbish

Waste along a road that decomposes a lot of time

Waste at a corner of a building

Where is the rubbish? Almost invisible but still present plastic cup.

Cutting old trees – bad for the environment

Old waste paint
