

Using bikes dont release harmful emissions that pollute the atmosphere

Using the
electric car to
reduce a
pollution

Good example - Shop with used clothes

- part of circular economy
- VERY CHEAP prices
- supports the economy - pays taxes
- provides job and source of income
- prevents wasting
- simple construction from reusable materials
- never renovated (saved energy and materials)

Good Example: New tree being planted after some old one was cut down

Good example
box for the old clothes for the
people which need some clothes

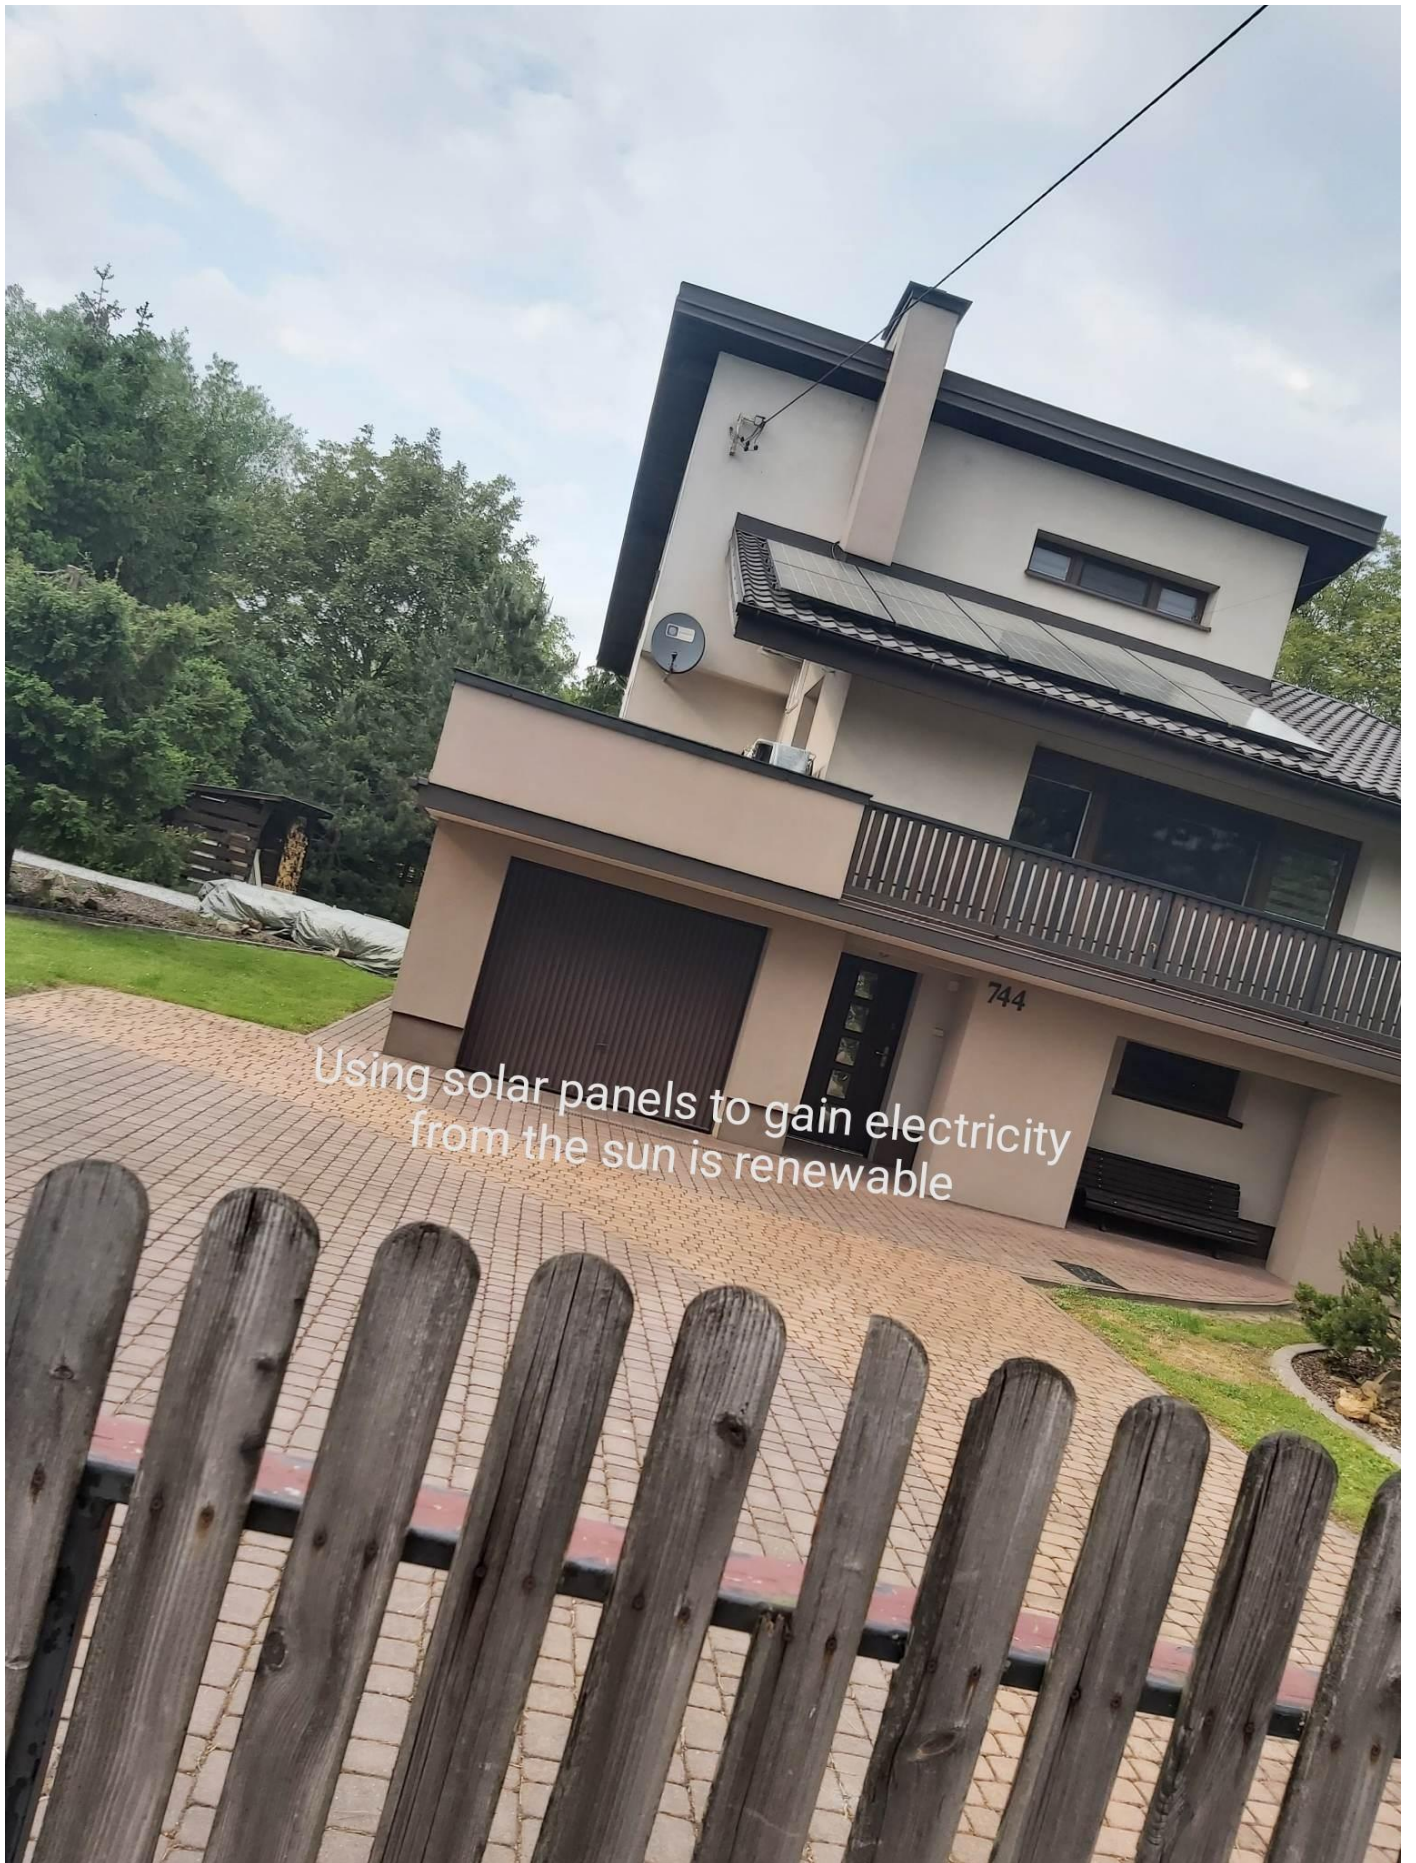

We can see a person using a *bicycle*, consequence of
it can be seen in the form of green environment.

Solar panels – green energy

Green field between houses – protects the soil and biodiversity

Using solar panels to gain electricity
from the sun is renewable

Solar panels – free and no emission source of energy

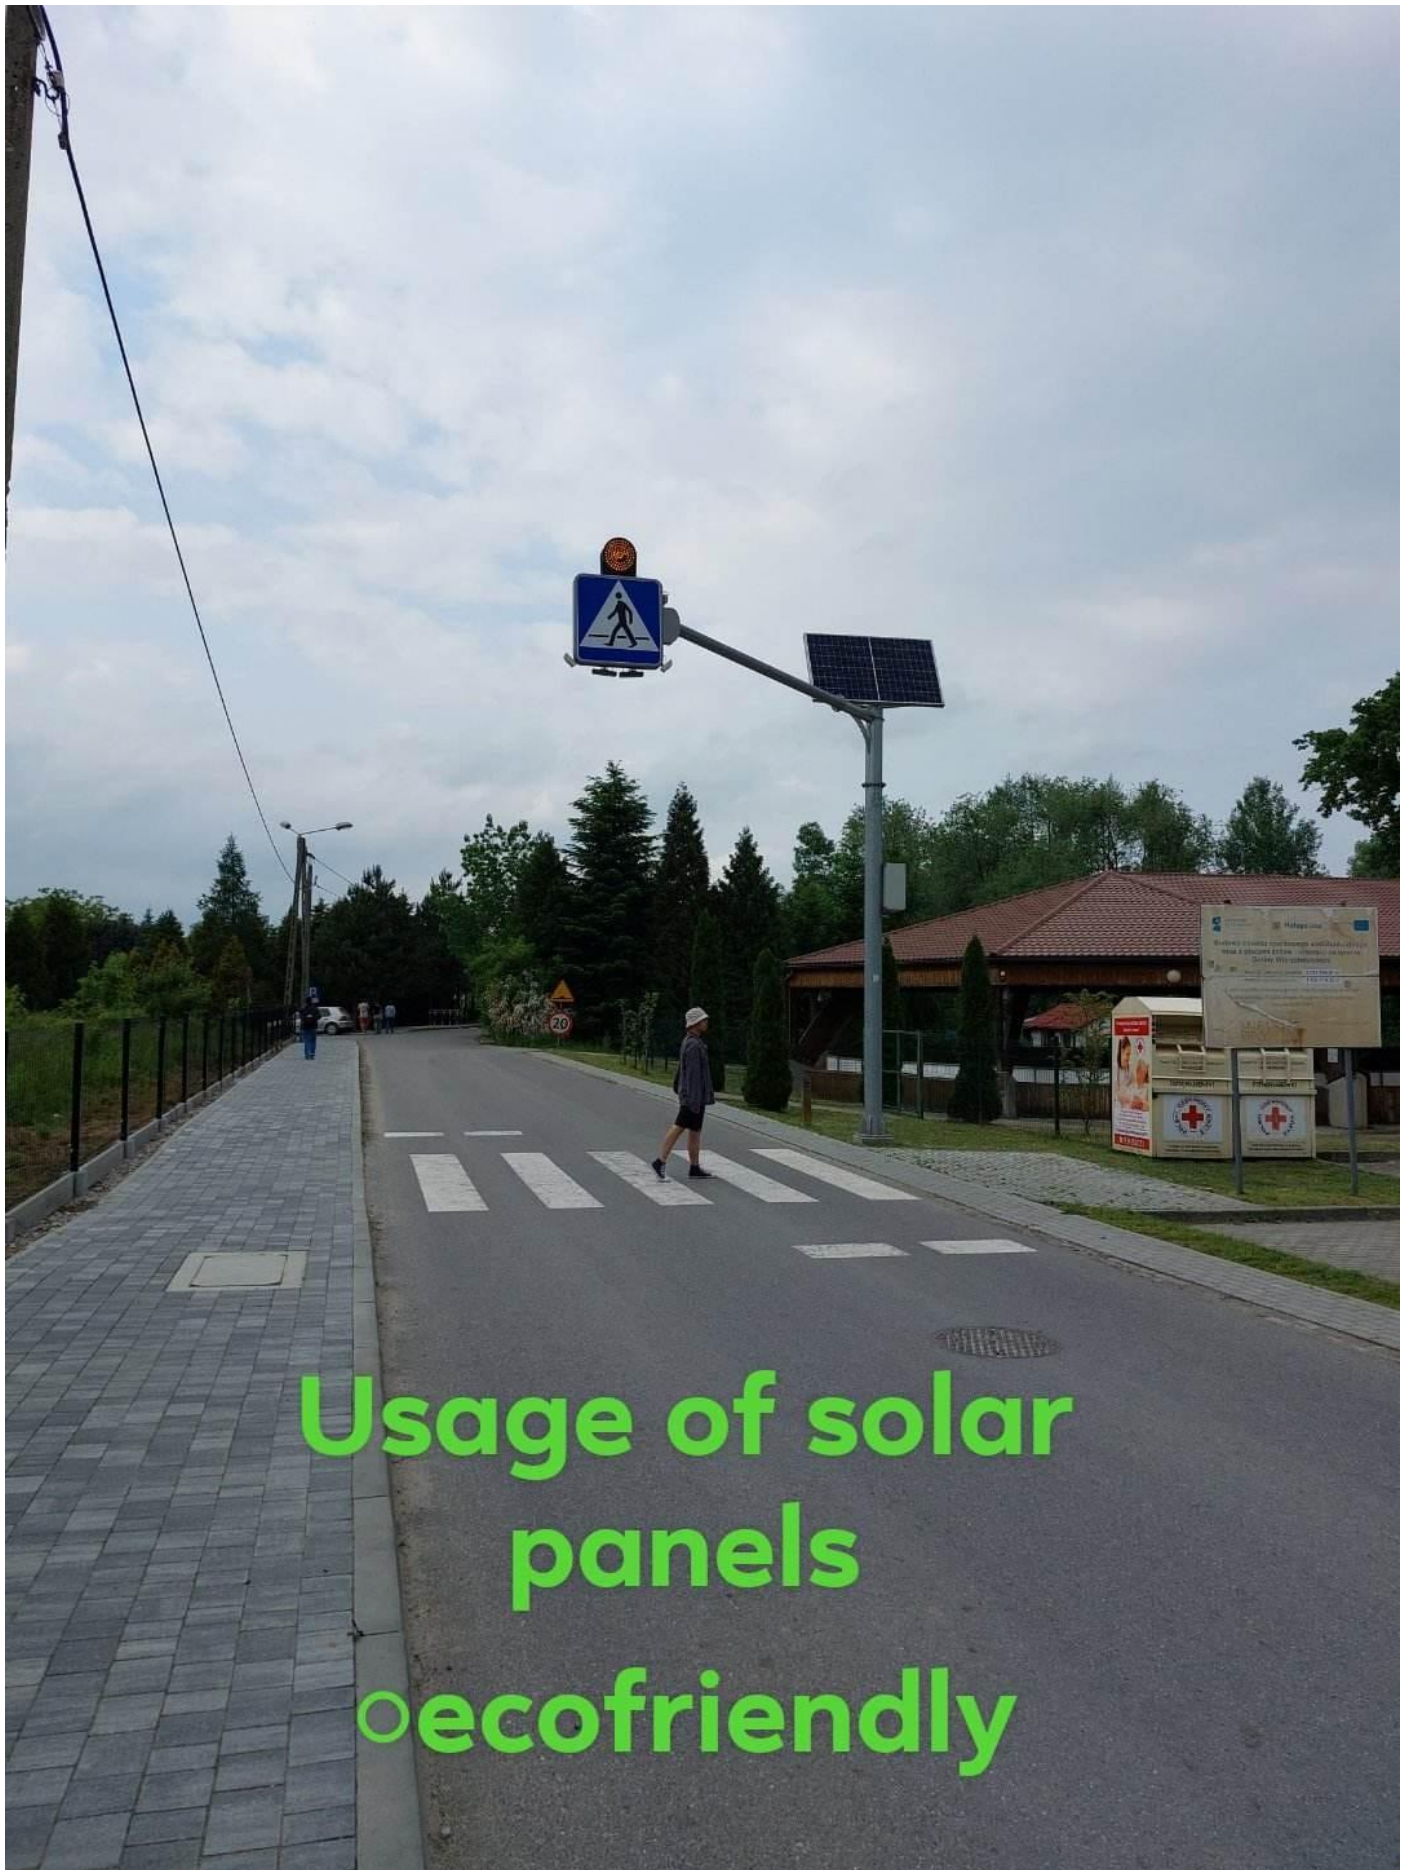

A photograph of a two-story yellow house with a dark roof. The roof is covered with solar panels. The house has a balcony with a wooden railing and a satellite dish on the wall. In the foreground, there is a field of tall green grass. The sky is overcast.

Solar energetics, as one of the renewable energy sources, is characterized by its minimal impact on the environment.

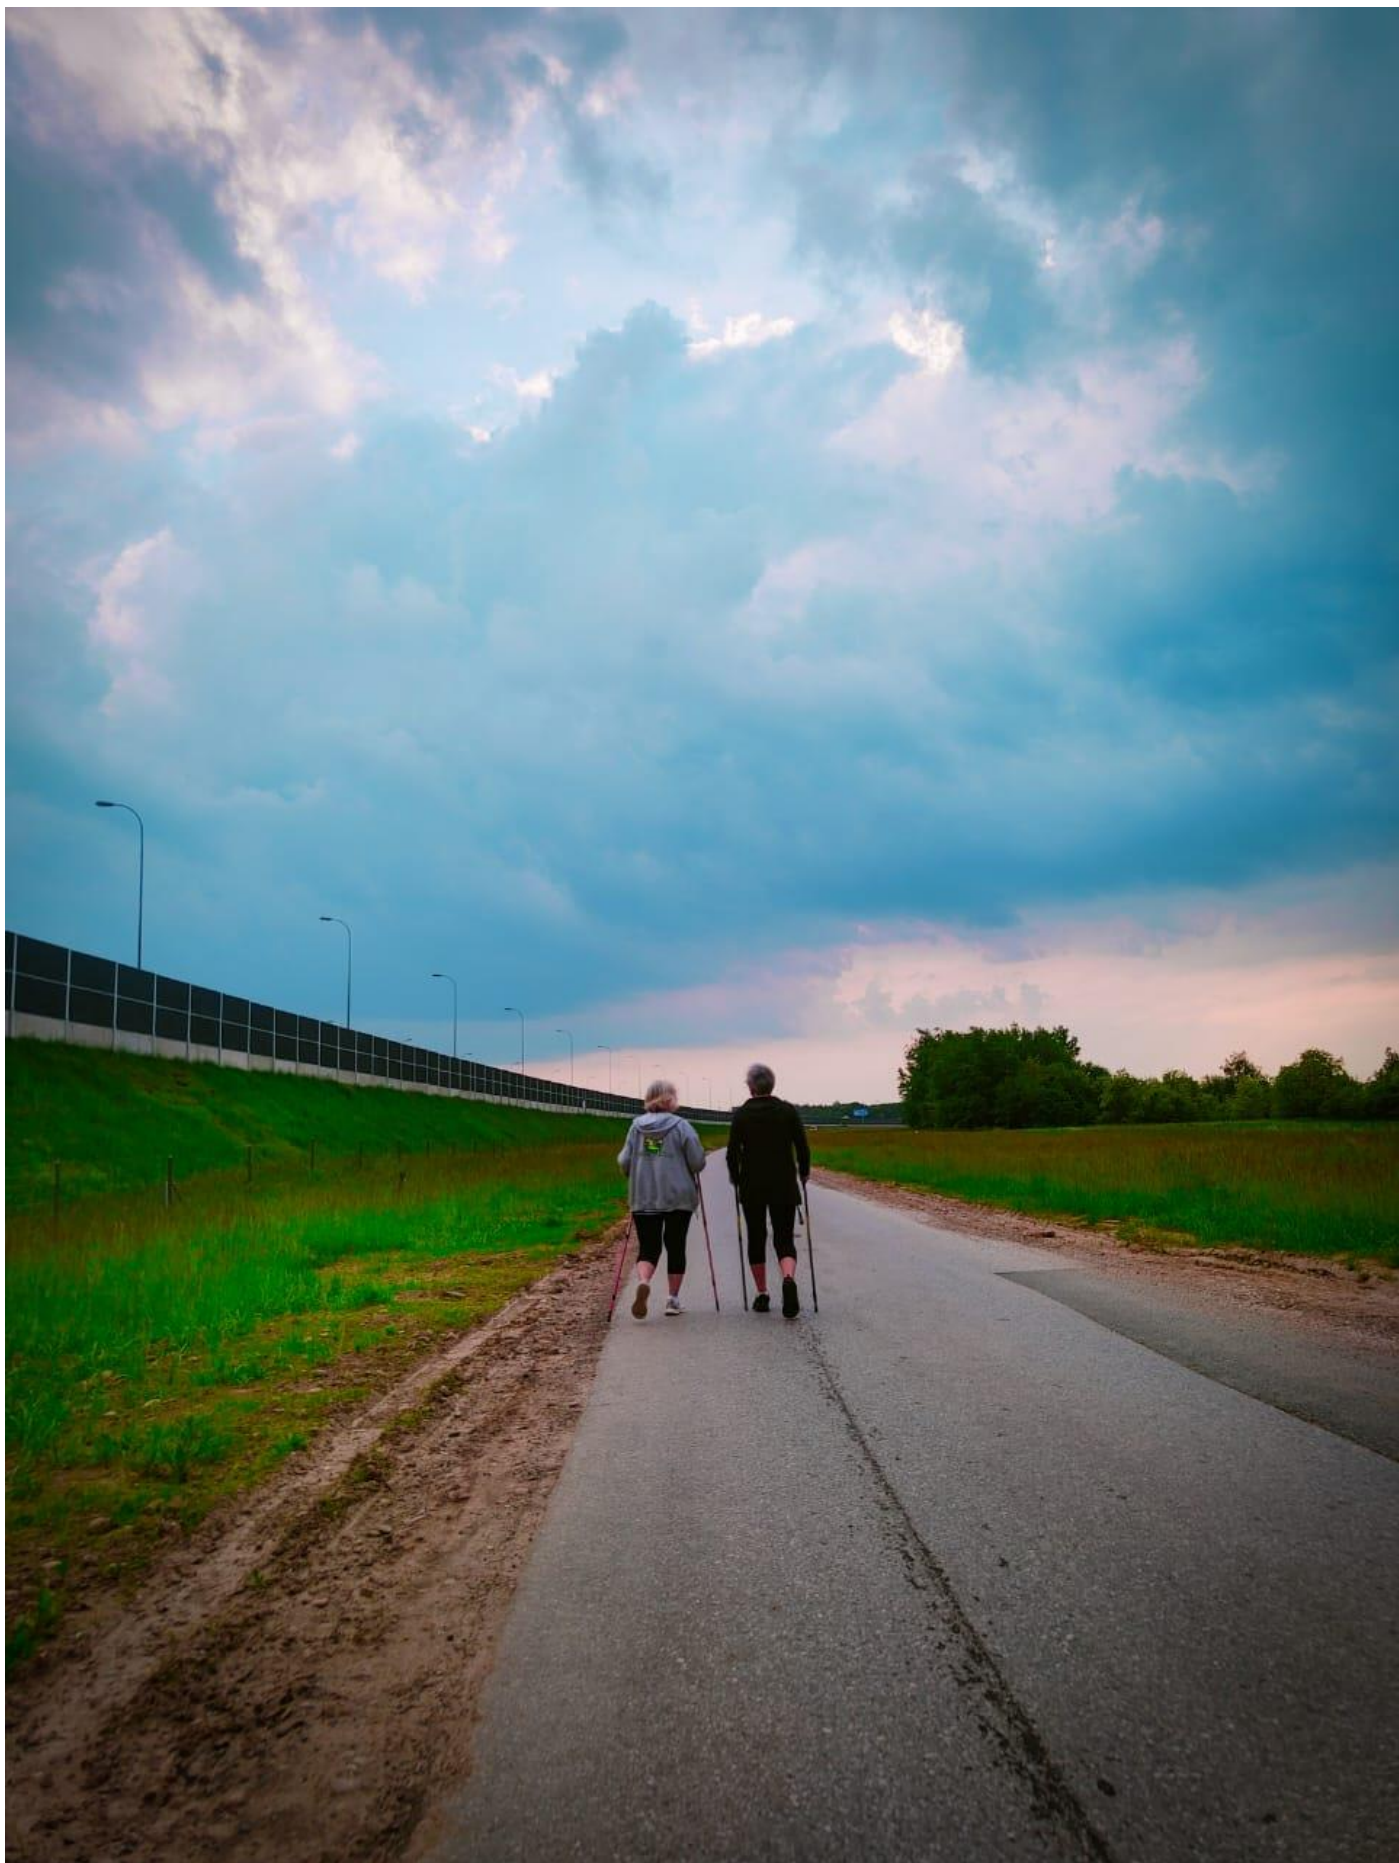

Containers for old clothing

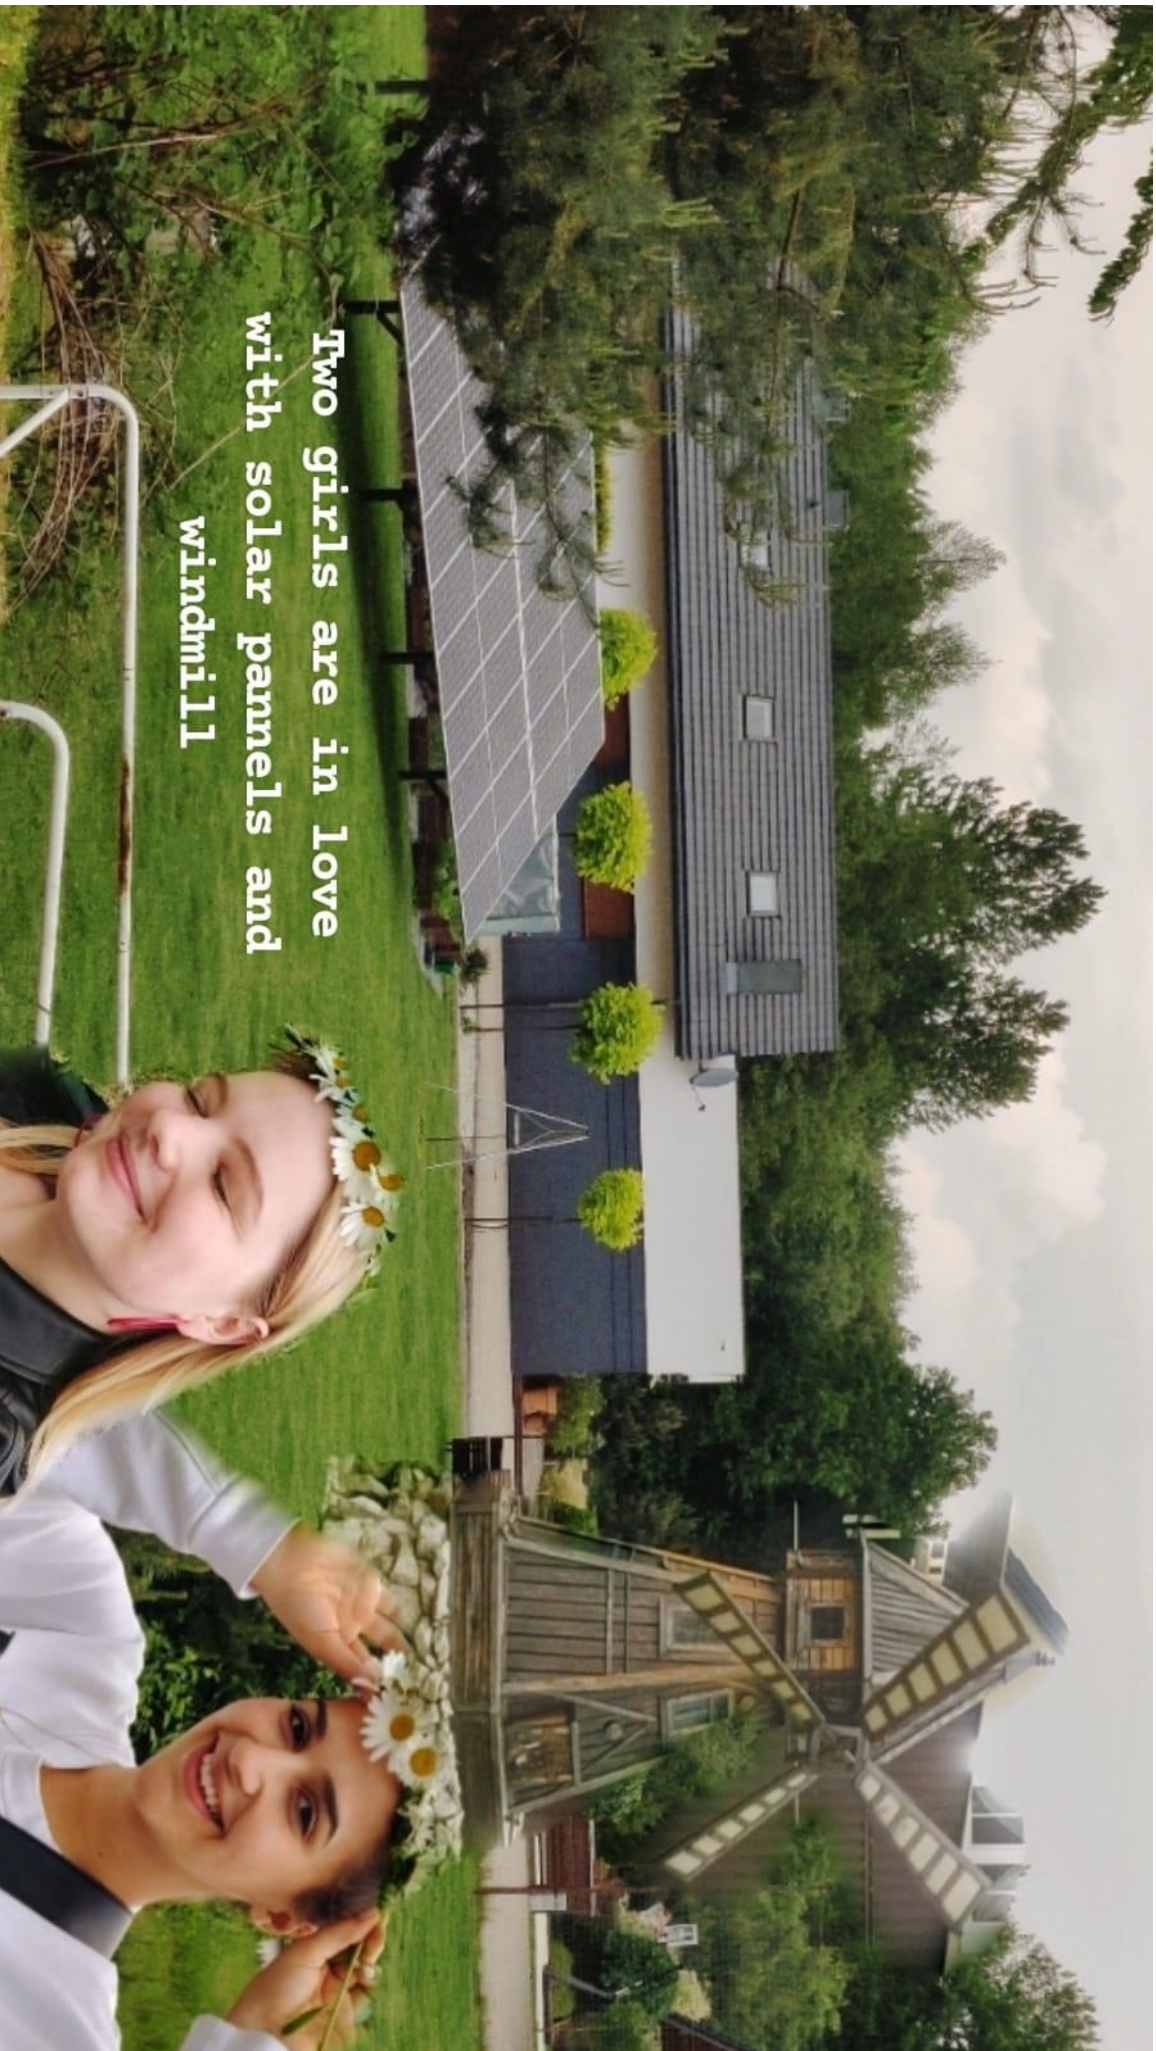

- Helping those who are in need
- reusing materials

Usage of solar
panels
is ecofriendly

Nordic walking – healthy and free transport

Two girls are in love
with solar pannels and
windmill

Solar panels – reduce amount of CO₂ in the atmosphere

Bio waste – can be used as a fertilizer

Collecting caps - recycling

Collecting rain water for gardening

Waste segregation

Solar panel on a pedestrian crossing – free light during the night

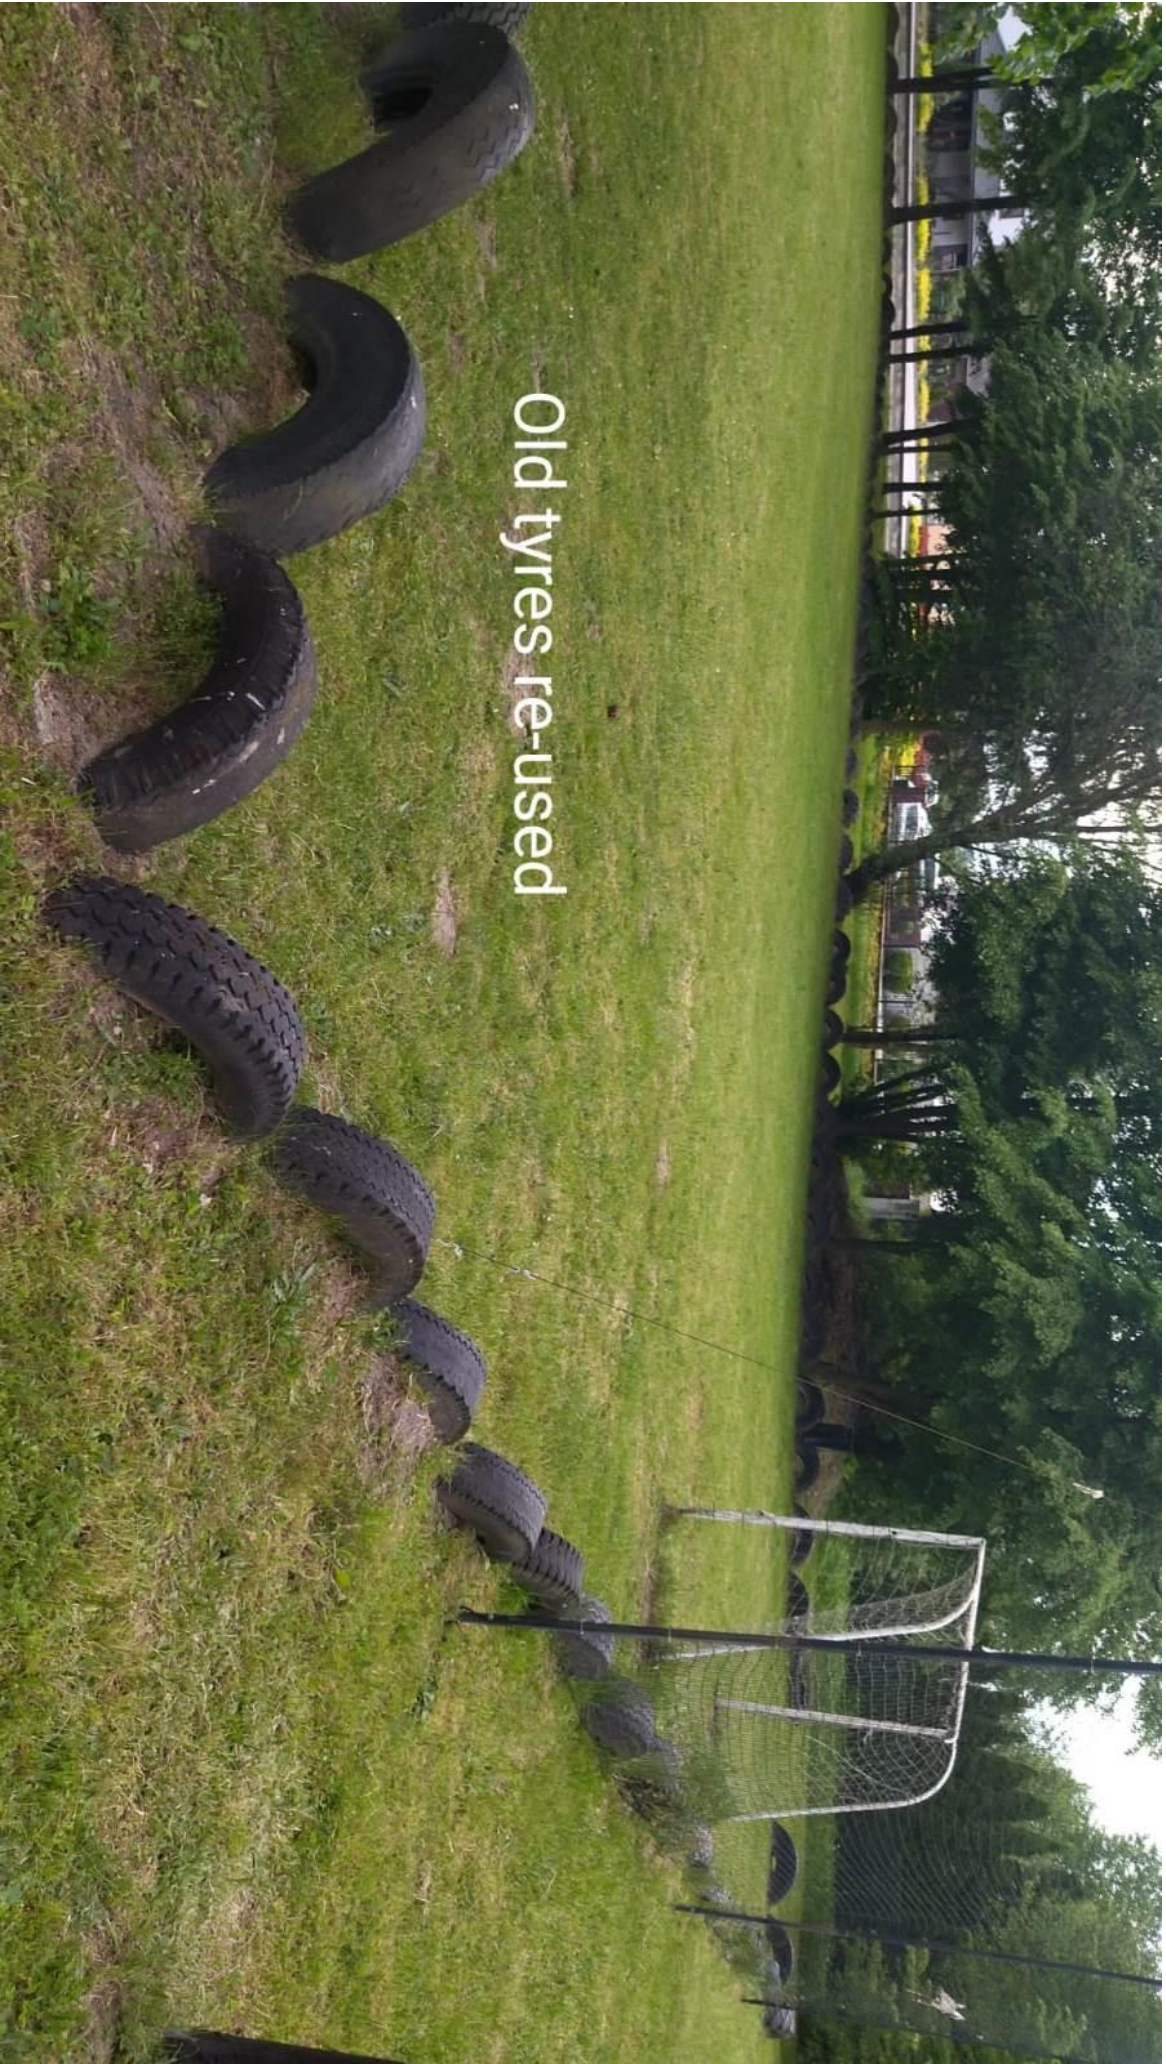

Solar panels near an electrical post – free energy

Waste segregation into different groups

Solar panels – ecological source of energy

Old tyres re-used

Bottle recycling plant

GOSPODARCY
ul. WILKOWSKA 10B
41-200 SZCZECIN

Grazers – free grass cutters

Picking up and segregating waste in the Park

Solar panels – zero emission source of Energy

Fence around a highway – protects the environment from the noise

Cycling – zero emission, healthy and comfortable way of transport

Bike – a green means of transport

Bikes used to go around the town – eco transport
